A New and Faster Telephone Service Between Exchanges in the Orlando, Fla., District

Effective July 20th, 1925

the Company will inaugurate a new and faster service between certain of its exchanges in the Orlando District.

Beginning July 20th, calls from all stations in these exchanges of the Orlando District may be made under this new and faster method whereby you can call a distant station by simply giving your local operator the telephone number of the distant subscriber.

For example: If you are at an Orlando station and desire to call a Sanford station, signal your operator in the usual way and when she asks "Number, please?" say "Sanford 123." While you hold the receiver to your ear, she will ring the desired Sanford number.

This new and fast service applies to calls made by numbers only. Calls for a particular person must be given to "Long Distance" in the usual way.

The listings of all exchanges in the Orlando District are now included in the Orlando book. Consult the directory and if the number of the desired distant subscriber is not listed, call "Information."

Below is a list of the points between which this new service will be given both ways:

Orlando and Winter Garden	Orlando and Sanford
Orlando and Apopka	Orlando and Kissimmee
Orlando and Ocoee	

TRY THIS NEW SERVICE. IT IS FAST. YOU WILL LIKE IT.

Only a Step by Telephone To Your Cuban Neighbor

TO lay the world's longest sub-marine cable between Key West and Havana required arduous work and tested the skill of engineers and scientists.

Its completion makes Cuba actually Florida's next door neighbor.

Cuban trade naturally belongs to Florida and the direct telephone service makes it easy to win.

Are you getting your share?

Ask Long Distance for details about the splendid service and reasonable rates.

DAVID LAIRD, Florida Manager

If You Are Planning To Build Call Our Engineers First

Architects, electrical contractors, builders and building owners, should call a telephone engineer before building.

When provision for telephone wiring is not made in the original building plans, it may be necessary for the building owners to make extensive, costly and unsightly alterations after completion of the building, in order to conceal the wires running through the halls, rooms or corridors, for furnishing telephone service.

The engineers of this company will be pleased, at any time, to give architects, owners, electrical contractors or builders the benefit of their experience in such matters without charge and assist them in planning the proper system for telephone service wiring in each individual case.

Rules and Regulations Applying to All Subscribers Contracts

CLASSIFICATION OF AREAS AS THE BASIS FOR FURNISHING TELEPHONE SERVICE

Economical operation of the telephone business, to secure protection to the whole body of rate payers and to the business itself, requires that the property be built and operated in accordance with a definite plan under which specified classes of service are regularly furnished in specified areas or types of areas. The Telephone Company therefore does not undertake to furnish any desired class of service at any desired location, nor does it undertake to extend its plant to remote sections where such extension is not warranted by public necessity as distinguished from personal desire, except where protection is afforded.

The general plan for furnishing telephone service as authorized in the General Exchange Tariff is based on a classification of areas by types for the determination of the classes of service available and for the application of rates.

TERM PERIOD OF CONTRACT

The Company's contracts covering the furnishing of telephone service are ordinarily for initial term periods of one year. Under some special conditions involving unusual installation costs or involving the installation of special equipment, contracts may be required for longer initial term periods. Season contracts are for minimum periods of six months and season rates are applicable thereunder.

The Telephone Company's obligation to furnish telephone service is dependent upon its ability to procure and retain suitable facilities and rights for the construction and maintenance of the necessary circuits.

CONSTRUCTION AND INSTALLATION CHARGES

The charges and regulations specified in the Company's General Exchange Tariff apply in connection with all classes of service equipment or facilities furnished by the Telephone Company.

No charge is made for providing new pole line construction on public highways, when the subscriber is located within the base rate area. No charge is made for providing and maintaining new pole line construction along public highways outside the base rate area, when such pole lines are to be used in serving subscribers in general.

Except as provided above, when an applicant for service is located outside of the base rate area in territory where new pole line construction is required and the cost of providing the necessary additional poles is more than three times the annual mileage charge for the circuit thereon, connection with the Telephone Company's system is provided in one of the following methods as the applicant may elect:

The subscriber may bear the cost in excess of the amounts specified above of providing the poles and pay extra exchange line mileage charges for the necessary circuit. Ownership of such poles is vested in the Telephone Company. Maintenance of poles and circuits is at the expense of the Telephone Company.

The subscriber at his own expense may furnish the portion of pole line and circuit from his location to an agreed upon point of connection with the Telephone Company's system. The subscriber is required to maintain or bear the expense of maintaining his portion of the pole line and circuit and also to bear the expense of installing and maintaining the station equipment, except that when the station is brought to the Company's central office for repairs, no labor expense incurred for such repairs is charged to the subscriber. The subscriber is charged extra exchange line mileage charges for that portion of the Telephone Company's circuit outside of the base rate area. Ownership of the portion of pole line and circuit provided by the subscriber is vested in the subscriber. Ownership of the station equipment is vested in the Telephone Company.

Poles on private property to be used in serving an individual subscriber must in all cases be furnished and maintained at the subscriber's expense. Ownership of such poles on private property is vested in the subscriber.

No charge is made for furnishing and maintaining poles on private property when such poles are to be used to carry circuits serving subscribers in general. In such cases, ownership of poles on private property is vested in the Telephone Company.

Whenever it becomes necessary to replace poles on private property, the new poles are furnished only in accordance with the arrangements specified above.

All circuits on poles on private property are owned and maintained by the Telephone Company.

When a specified type of construction is desired by a subscriber, as for example, when underground service connections are desired in places where aerial wiring is not readily available to reach subscriber's premises or where the individual requirements of a subscriber make the installation unusually expensive, the subscriber is required to bear the cost of such special construction or installation.

DEPOSIT REQUIREMENTS AND MOVING CHARGES

A deposit is required covering the connection of a subscriber's station with the exchange of the Company and a charge is made covering a move of a station from one location to another location. These deposit requirements and charges for moves are published in detail in this directory.

UNAUTHORIZED USE OF THE TELEPHONE

Telephone equipment and facilities are furnished for the use of the subscriber, employees, agents or representatives of the subscriber or members of the subscriber's domestic establishment except in connection with semi-public telephone service and except as the use of the service may be extended to joint users.

All equipment furnished by the Telephone Company shall remain the property of the Company. Such equipment shall not be used for any toll or consideration to be paid by any other person than the subscriber, nor for performing any part of the work of transmitting, delivering or collecting any message, where any toll or consideration has been or is to be paid any party other than the Telephone Company, without the written consent of the Company. Subscribers may not disconnect or remove or permit others to disconnect or remove any apparatus installed by the Telephone Company, except upon the written consent of the Company.

UNAUTHORIZED ATTACHMENTS

The telephone equipment, apparatus and lines furnished shall be carefully used and no instrument, appliance or device, of any kind, not furnished by the Telephone Company shall be attached to or in any way used in connection with such telephone equipment, apparatus and lines. In case any instrument, apparatus or device of any kind other than that furnished by the Telephone Company is attached to or connected with any part of the Company's property, the

Telephone Company reserves the right to remove such instruments, apparatus or device and to suspend or discontinue service without any claim on the part of the subscriber.

CHANGES OF CALL NUMBERS

In order to provide facilities for growth it is necessary for the Telephone Company to add new plant and rearrange existing plant. Such additions and rearrangements frequently require changes in call numbers. We appreciate that changes in call numbers are to be avoided where possible, and such changes are never made by the Telephone Company except when required by engineering necessity. The Company reserves the right to change the subscriber's telephone number or designation at any time.

PARTY LINE SERVICE

When party line service is furnished, the Telephone Company may in consideration of the rate at which service is furnished establish and furnish service to one other subscriber in the case of two-party line service, and other subscribers in the case of multi-party (more than two-party) line service. The Telephone Company reserves the right to cancel any two-party line or multi-party line contract, upon thirty days' notice, whenever in the judgment of the Company, the use of the subscriber holding such contract is such, from large use or other causes, as to interfere with the reasonable use of others connected with the same line.

All ordinary expense of maintenance and repairs, unless otherwise specified in the General Exchange Tariff or the Local Exchange Tariffs, is borne by the Telephone Company. The subscriber is billed the actual cost of each telephone instrument or piece of apparatus injured or destroyed otherwise than by unavoidable accident.

TERMS OF PAYMENT

The subscriber shall pay monthly in advance or on demand all charges for exchange service and equipment and shall pay monthly on demand all charges for toll service. The subscriber assumes responsibility for all charges for exchange service and toll messages originating at the subscriber's station, and for toll messages received at the subscriber's station on which the charges have been reversed with the consent of the person called.

All charges due by the subscriber are payable by the subscriber at the Telephone Company's Commercial Office or at any other agency duly authorized to receive such payment. If objection in writing is not received by the Telephone Company within thirty days after the bill is rendered, the account shall be deemed correct and binding upon the subscriber.

In the event of abandonment of the station, the non-payment of any sum due or any other violation by the subscriber of the Telephone Company's rules and regulations applying to subscribers' contracts or to the furnishing of service, the Company may without notice, either (a) suspend service until all violations have ceased, or (b) terminate the subscriber's contract without suspension of service or (c) following a suspension of service, sever the connection and remove any of its equipment from the subscriber's premises.

When instruments have been removed for non-payment, the contract is considered to have been terminated. Reinstallation of service may be made only upon the execution of a new contract.

UNINTERRUPTED SERVICE NOT GUARANTEED

In view of the possibility of errors and difficulties in the transmission of messages by telephone and the impossibility of fixing in all cases the causes thereof, the subscriber assumes all risks connected with the service, as the Telephone Company cannot guarantee uninterrupted working of its lines and instruments. In case service is interrupted otherwise than by the negligence or willful act of the subscriber, an allowance is made, computed on the basis of the minimum monthly rate for such of the telephone service, equipment and facilities furnished as are rendered useless or inoperative. Such allowance covers the period the interruption continues after notice in writing is received by the Telephone Company. No other liability shall in any case attach to the Telephone Company.

For the purpose of inspecting, repairing or removing any part of the Telephone Company's equipment, apparatus and lines on the subscriber's premises, the Company's employees shall have access thereto at any reasonable hour.

No liability shall attach to the Telephone Company by reason of any defacement or damage to the subscriber's premises, resulting from the placing of the Company's instruments, apparatus and associated wiring on such premises, or by the removal thereof, when such defacement or damage is not the result of negligence on the part of the Company or its employees.

The Telephone Company shall not be liable for damages or statutory penalties in any case where a claim is not presented in writing within sixty days after the alleged delinquency occurs.

When suitable arrangements can be made, lines of other companies may be used in conjunction with the Telephone Company's lines in establishing wire connection to points not reached by the Telephone Company's lines. In establishing connections with the lines of other companies the Telephone Company will not be responsible or liable for any action of the connecting company.

The Telephone Company will not transmit messages, but offers the use of its facilities when available, and will not be liable for errors in transmission or for failure to establish connection. Employees of the Telephone Company are forbidden to accept either oral or written messages to be transmitted over the lines of the Company.

PUBLIC PAY STATION TELEPHONES

Public Pay Station telephones are equipped with coin collecting devices. These coin collectors are of two types. One type requires that the coin be deposited to signal the operator. If for any reason the connection is not completed, the operator will return the coin through slot at lower left of the telephone set. The other type of coin collector does not require the coin to be deposited until request to do so is made by the operator. Instruction cards are displayed with each public pay station telephone explaining the operation and patrons should observe and follow those instructions when making calls.

TELEGRAMS BY TELEPHONE

At those points where the Telegraph Companies maintain an office for receiving and sending messages, telegrams may be transmitted to and received from telegraph offices by telephone. To send a telegram or cablegram, call by name the telegraph company desired. By arrangement with the Western Union and Postal Telegraph Companies, any telephone subscriber may have charges for messages, sent or received by these companies, charged to his telephone and collected with his telephone bill.

DO NOT USE THE TELEPHONE DURING A THUNDER STORM
